Permission Issue Fix

1. Allow Kiwix to access photos, media and files on your device.
   - DENY
   - ALLOW

2. Screen overlay detected
   - To change this permission setting, you first have to turn off the screen overlay from Settings > Apps.

3. Draw over other apps
   - Enabled

4. Apps with permission
   - Dimly
     - Yes
Repeat steps 4-6 for each app that might be overlaying. Then restart Kiwix and you should be able to grant the needed permission.
